**Clinical trials bring us closer to the day when all cancer patients can become survivors.**

Clinical trials are an essential path to progress and the brightest torch researchers have to light their way to better treatments. That's because clinical trials allow researchers to test cutting-edge and potentially life-saving treatments while giving participants access to the best options available.

If you're interested in exploring new treatment options that may also light the path to better treatments for other patients, a clinical trial may be the right option for you.

From spending her formative years up in a time of change to becoming the nation's first self-made African-American female billionaire, the three-part exhibit, *Watching Oprah: The Oprah Winfrey Show and American Culture*, is the ultimate American dream. Now you can experience it via items from Winfrey's childhood to the *Oprah Winfrey Show* that dominated daytime TV for a record-breaking 25 years. "Oprah Winfrey has gone on to have a profound effect on how Americans view themselves and each other," says museum director Lonnie G. Bunch III. No free cars for visitors, however. *Free and open to the public until June 2019, 1400 Constitution Ave. NW, DC, nmaahc.si.edu*
